

Dear FCC.,

Giving all Technician Novice/Tech operators phone privlages amounts to a ludicrous mistake of great proportions. Reason is: they have not earned the privlage of operating those freqs. Deleting the 5 wpm standard is a grave mistake. It does away with incenitive licensing. It ill preares our emergency operators of the most basic and easiest mode of communications we have ever had. It will cost lives. How many are you willing to kill to just let another group of ill informed people have another give away at the Nations Expense ? The USA is a Nation OF, LEADERS, NOT FOLLOWERS. I can well understand smaller Nations deleting the code, but not the USA. We will not serve our Nation by this ill concieved document.

Thank You,

Ray Dodson
